**Workshops**

*Drama, Movement, Music, Writing, and Painting & Clay Studios*

*A sense of belonging and of being at home are fundamental to our human spirit and identity. In therapeutic work, we encounter alienation, restlessness, disorientation and confusion, loss of identity and loss of a sense of place and purpose. The theme of homecoming symbolizes the goal and purpose of all our professional and personal striving.*

This week long residential course offers participants the opportunity to explore practical, creative and inspirational applications of Jungian psychology in personal and professional life. The programme includes formal lectures, discussions and creative arts workshops.
